

## A Change in Policy Might be Beneficial

Considerable credit is due the Municipal and Civic Committee of the local Board of Trade for the active campaign they are waging in having trees planted on various streets in Coleman and in other ways stirring up local interest towards beautifying our town, but just why the expense of these civic improvements should be entirely borne by the property owners in front of whose property these improvements are being made is difficult to understand.

A short time ago cement sidewalks were laid on certain thoroughfares in town and the property owners were assessed a portion of this cost and the town as a whole paid the balance. Is it not reasonable that the town as a whole should also pay a share of the cost of tree planting and boulevarding?

The average citizen does not need to be endowed with any special powers of observation to see that very little of his tax money has of recent years, at least, been spent on civic improvements in the residential portion of Coleman. To illustrate this we can take the case of Sixth street. The average taxes paid by residents of this street are around \$25.00 per year for town purposes, and with something over 40 parcels of land on this street, the town treasury receives a revenue of over \$1,000 a year from this one street in the residential district. During the past four years between \$4,000 and \$5,000 has gone into the town coffers and for this money the taxpayers have received back—other than police and fire protection and book-keeping—the services of one man for a week raking up stones. For sake of argument say this civic employee received \$7.00 per day or \$42 per week, making a total of \$168. Team and man hauling away stones one day a year at \$16 per day for four years \$64. This added to \$168 would make \$232 for the four years. As the town authorities do not supply public utilities such as light, water, scavenging, etc., there is practically very little, if any, other expenses, other than those mentioned to be deducted, it is indeed rather strange when all this surplus money is spent.

We believe the 6th street illustration is a fair example of what has taken place in at least the greater part of the residential portion of the town, and it would seem to be high time that some action was taken by the authorities to spend some of their revenue on civic improvements in the residential area of Coleman, even though it is necessary to curtail the amounts annually spent on improvements in the business section, relief measures and other civic work.

The Journal knows full well that there is a lot of grief in trying to make both ends meet in municipal work and has no desire to be unduly critical, but we feel that the interests of certain sections of the town have for some years been sacrificed in order to provide money for improvements, relief and other expenses that might properly have been curtailed. The unpaid taxes in Coleman amount to many thousands of dollars, and is becoming a very serious problem for the authorities to cope with. These delinquent taxpayers might more readily part with their money provided some tangible evidence of civic improvement in their locality was manifest.

Don't forget the Whist Drive in St. Jean's Parish Hall on Easter Monday, April 5th. Six good prizes. Refreshments served.

## Cost of Swimming Pool Will be Close to \$8,000

According to information to hand it is learned that the revised estimates of the cost of the proposed swimming pool for Coleman will total about \$8,000. This was the total of the figures submitted by the engineer at a recent meeting of the swimming pool committee.

Readers of The Journal will remember that the former estimates given out at a meeting of this committee last year totalled \$5,120, and The Journal advised against commencing construction at that time on the grounds that before the pool was completed the cost would exceed this figure by at least one-third. The \$8,000 estimate tabled last week goes to prove the wisdom of our advice.

By all means let us have a swimming pool, but rushing construction before the money is in sight would only be piling up trouble for those having to finance the venture.

## BE SURE TO NOTIFY THE RIGHT OFFICE

It was brought to our notice this week that some local people are under the impression that if they desire to discontinue a newspaper, all that is necessary is to notify the postmaster. Just how they get this idea is hard to understand. Postmasters are not empowered to stop newspapers. All publishers of newspapers maintain an office of publication and the office where the newspaper is published is the proper place to notify either to discontinue or subscribe.

## Go After The Saskatchewan And Manitoba Coal Market.

The Alberta Coal Commission, who have made an exhaustive investigation into the mining industry in Alberta, issued their report last week. Possibly very few people will report through the voluminous report consisting of hundreds of printed pages, and it is also more than likely that 90 per cent. of their recommendations will never be acted upon. However, there are several points brought out in their report, which if they are consummated, might result in much lasting good to all engaged in the coal industry in Alberta.

Adding a portfolio of mines to the provincial cabinet is one. Improving the quality of coal shipped is another. Economy of production and economical marketing is another point the report mentions as of vital importance. Cheaper freight rates and extending the market for Alberta coal are the two factors governing this, as mines that operate steadily can reduce their overhead costs on tonnage mined, while cheaper freight rates naturally make more economical marketing.

The Commission also stress the desirability of concentrating on the Saskatchewan and Manitoba markets, which up until a few years ago were largely using Alberta coal, rather than attempting to go further East to Ontario. This appears to be the most practical suggestion of the move offered in the report for improving the coal business in the province. United action by all interested in the industry, assisted by the provincial government, should in time bring about the desired result.

Mr. J. Lang, of Coronation, is the new operator at the station taking Mr. McKenna's position.

## Executive Meeting of Coleman Scouts Assoc.

An Executive meeting of Coleman Boy Scouts Association took place in St. Alban's Hall on Monday evening with the following members present:—Rev. Father McCormick, Rev. H. L. Nobbs, Messrs. S. Howarth, R. Young, E. F. Gare, G. Key-Jones, C. Shaw, J. Kerr and Secretary J. Ashridge.

The first matter of business was the report of the organizers of the various troops. Father McCormick reported that the Roman Catholic Church troop had already enrolled thirty-three scouts and others in prospect, with the promise of at least twenty-four younger boys as Walt Cubs.

Mr. C. Shaw, for the Anglican Church, reported that they were hard at work getting boys to enroll and in the course of a short time expected to have a very good membership of Scouts and Cubs.

It was also announced that the Salvation Army were applying for a charter to enable them to form a troop of Life Savers and that those behind the work had every hope of attaining a splendid troop.

The Secretary was instructed to apply to headquarters for the following warrants:—Mr. G. Key-Jones, Commissioner; Mr. C. Shaw, Scoutmaster No. 1; Mr. R. Haig, Asst. Scoutmaster No. 1; Mr. R. Haig, Asst. Scoutmaster No. 2; Mr. R. Haig, Asst. Scoutmaster No. 3; Mr. R. Haig, Asst. Scoutmaster No. 4; Mr. R. Haig, Asst. Scoutmaster No. 5; Mr. R. Haig, Asst. Scoutmaster No. 6; Mr. R. Haig, Asst. Scoutmaster No. 7; Mr. R. Haig, Asst. Scoutmaster No. 8; Mr. R. Haig, Asst. Scoutmaster No. 9; Mr. R. Haig, Asst. Scoutmaster No. 10.

Rev. Mr. Nobbs gave permission to use St. Alban's Hall for gymnasium purposes.

It was decided that all members of the Executive be authorized to accept names of people as members of the local Association on payment of fee of \$2.00, one dollar of this amount has to be forwarded to headquarters when registering members.

Mr. J. Kerr was requested to approach the officers of St. John Ambulance Assoc. with respect to securing their assistance in first aid work. The matter of a badge band for the local troop was left over until a later date. It was decided to ask some local store keeper to stock Scout uniforms in order that all Scouts may purchase these as soon as convenient.

The next meeting of the Executive takes place on Tuesday, April 6th.

Scouts meet every Friday evening and any boys desirous of joining will be heartily welcome at these gatherings.

## The Order of the Genesis

A western paper says that in the beginning God created the heavens and the earth, then he made the sun, the moon and the stars, then he made the earth, the liberal advertiser and the prompt paying subscriber, and it was good. The next day a blizzard set in and he created the man who did not believe in advertising, and another who did not take his home paper, and then he rested. Then the devil got into the moulding room and he created the fellow who takes the paper for years and then fails to pay for it. After completing that sorry job and having a few lumps of mouldy clay left he made the excuse for a man who settles the subscription by instructing the postmaster to mark his paper "refused" and he felt so mean about it that he has been kicking himself ever since.

## Canadian Exhibition Highly Successful.

K. of F. Hall Thronged With Citizens—Forestry Exhibit Very Attractive and Educational.

St. Alban's Treasury Enriched by About \$126.

The Knights of Pythias Hall on Wednesday last, St. Patrick's Day, presented a gay night. A Canadian Exhibition had been arranged by the people of St. Alban's Church and it fully justified its name.

Outside the hall the Canadian ensign attracted the attention of the people and a good display of posters printed by the Coleman Journal told the people what to expect.

The programme was as follows:—3 to 6 p.m., The Canadian Exhibition; Mrs. Graham Sr. had a splendid display of pot plants and flowers. The advertising stall was contributed to by the following firms:—Carnation Milk Co., Nabob Tea Co., Coleman Lamp Co., P. Burns Co., Swift Canadian Co., Martin Senior Paint Co., Bastien Bros. Indian Moosine, Interlake Tissue Co., etc.

Mrs. Graham Sr. and Kay presided and did a good business in advocating the use of Canadian made goods. A Bren Pie was provided by the Children of the Church and a novelty feature was a White Elephant Sale under Messrs. A. J. Morris and son.

The ladies of the W. A. under Mrs. Barrington, the President, dispensed tea in a delightful tea alcove, this was well patronized.

One of the most interesting and attractive features of the Exhibition was the forestry exhibit arranged by Mr. J. H. Boulton, local Forest Ranger.

On a table were samples of various woods, Canadian yew, birch, pine, fir, cedar, etc., showing the grain and texture of these products of the forest. Mr. W. Aniel courteously explained the uses of these various types. There were also a number of animal skins, one large bear skin, a beautiful specimen could not escape notice. It is the property of Mr. Albert Sagie. Other furs exhibited were lynx, wolverine, grey wolf, deer and beaver. A number of mounted animal heads decorated the wall. A small Douglas fir, birch, white pine, jack pine and lamarack which had been collected from the district were arranged around the table.

A great deal of credit is due to Mr. Boulton for his work. Such an exhibit makes us appreciate more highly the value of our forests.

At 7 p.m., Mr. Officer of the C. P. Ry. staff gave a splendid exhibition of Canadian Scenic Films. Between the reels Mr. Wootton of Blairmore delighted the audience with a couple of good songs, also, Mr. Sidney White played a violin solo "Cavalleria Rusticana" by Mascagni, which showed careful technique and was well applauded by the large audience. Miss Fraser gave a very pretty Irish dance in costume. During the pictures Mr. Morrison gave a Radio Concert of Irish music picked up in the air.

At 9 p.m., a dance took place and the music was all that could be wished. Mr. Bond's orchestra providing the music.

The prize list is as follows:—Coleman Lamp Co.'s Premier Lamp, Mrs. J. Mull; Bastien Bros. Moosine Shippers, Mrs. W. Bosworth; Macmillan Wilson; Pettison Flower Vase, Miss Wilson Jr.; Parcel of Groceries donated by various advertisers; Mrs. Eacott; Fern, A. E. Graham; Iced Cake, donated by Mrs. G. H. Snod; Ham, donated by Mrs. G. H. Snod.

(Continued on Page 8)

## Local Member Suggests Giving Policemen Corkscrews

What do you think of the proposal of P. M. Christopher, Labor member for Rocky Mountain, to disarm the police forces of the province when they are on ordinary duty.

"If you must arm them give them a corkscrew," snorts Chris. "They won't be able to do so much damage."

It was pointed out that this has other advantages. Any time you wanted to open a bottle you'd only have to bring a police whistle into action to get assistance.

"Fine, but how could we get to sleep in Calgary with police whistles blowing all night?" queried Bob Marshall.

If your competitor talks about you put him on your payroll. Never mind what he says, so long as he talks.

## BOOST COLEMAN!

Ill fares the town that does not advertise.

Cooperation is born of understanding one another's problems.

Some fellows think of community work as the ardent union man who refused to blow the quelling whistle because the blast ran a few seconds over the hour.

The straw that broke the camel's back may be in your mattress. It may tickle you to lie on it, but may also be the means of losing your chance of success by sleeping overtime.

## W. I. Have Interesting Meeting. Plan to Raise Some Funds

The regular meeting of the Women's Institute was held at the home of Mrs. McLean, 6th St., on Tuesday evening, March 23rd. There were 16 ladies present.

It was decided in order to raise some funds to give a series of bridge parties, for which a small fee will be charged. Two parties were arranged for, one at the home of Mrs. C. S. Oulmette, with Messdames Rippin, McLean, Short and Oulmette as hostesses, another at the home of Mrs. Price with Messdames Bosworth, Cornett, Graham and Price as hostesses.

Messdames Fraser, McLeod, Allan, Gare and Johnston are also planning to hold a social evening, but have not as yet decided just what form it will take. Other members will arrange something at the next meeting.

The Millinery Demonstration which was applied for 1926 will be given from July 9th to 12th. Further details will be published later.

The roll call was replied to with a quotation on Child Welfare. A very interesting paper on Child Welfare was given by Mrs. Cornett. Mrs. Bosworth demonstrated making violins which was greatly enjoyed by all.

Roll call for April will be Simple Pudding recipe. Mrs. A. F. Short will demonstrate making a white cake. Mrs. Johnston will give a paper on Citizenship.

The next meeting will be held at the home of Mrs. A. F. Short, Carbondale, on Tuesday, April 27th.

## Phone 209

If you know of an item of local news, call 209. Social items, personals, etc., are welcomed by The Journal. Your co-operation is invited in the gathering of local news.

## Fire Fiend on Rampage in Town

Three fires within two weeks is the unpleasant record hung up in Coleman of late, and slightly tarnishes the town's previous splendid reputation of being fairly free from disasters of this unfortunate nature.

Saturday night about 11.45 one of the best residences in Bush Town, owned and occupied by Mr. and Mrs. J. Loyd and family, caught fire and despite the efforts of many willing workers was a smoldering ruin inside an hour.

Mr. Loyd was working in the mine and was discovered and barely had time to escape unscathed. The entire contents and building were destroyed. Their loss, however, is covered by insurance, according to Mr. A. M. Morrison, local agent of the insurance company.

Sunday afternoon at 4 o'clock a second outbreak occurred about two hundred yards west of the previous fire, when a small dwelling together with several stables and chicken houses were totally destroyed. G. Pedrote, the owner of the house carried some insurance, but the other buildings were not insured and will be a dead loss to the owners.

In both cases the fires were outside the town's fire fighting area, and although the brigade responded to the call for help, very little could be done towards subduing the flames owing to lack of water pressure.

## AN EDITORIAL FOR EASTER.

During the 19th Century there were only two Easter Days on April 4th, the years being 1847 and 1868. In the 20th Century Easter falls on April 4th in the years 1915, 1926 and 1999.

It is interesting to know these facts, but does the knowledge of them contribute anything to the spiritual values of this Holy Day? Unfortunately there are some people who do not lend themselves either to the consecration or the celebration of the days set apart for increased spiritual devotion or patriotic fervor as the case may be. Does April 4th this year mean EASTER, in all its symbolism, or just "another Sunday"?

We may even lay aside all questions that have been raised as to the accuracy of calculation of the exact date of the anniversary of the Resurrection, and still find consolation in the recognized commemoration of an event sanctioned and sanctified throughout all Christendom.

We may admit the innocence of the seasonable custom of bedecking ourselves in gaily wrappings at Easter, and yet keep in mind the plain and simple raiment of Him who admonished to "take no thought... what ye shall put on."

We may find satisfaction in sumptuous dinners, coddling of children and gaiety of decoration, and still give thought to the "newness of life" that arose from the tomb of greatest sacrifice since the world began.

Easter, in its freshness and glory, is the great companion-day to Christmas. Its expression is purity, symbolized by the lily. It is the world's ushering in of spring, of newness of hope for higher Christian idealism. Anti-Christian sentiment can not but soften in its favor. Without Easter Day the world would have to count off a great mark in the moral and religious scale of human betterment.

# RED ROSE TEA

"is good tea"

And because you like good things you'll like Red Rose.

## A Year of Activity

With the coming of April, Western Canada will be away to a good start on another year of development and progress which, from present indications, promises to surpass any year since before the war. There are tangible and solid reasons providing a basis for this belief and offering encouragement to all Canadians who have a firm conviction of the future greatness of their country.

The financial statement of the C.P.R. for 1925 was the best one for the past nine years, and, after paying all expenses of operation, debenture interest and a ten per cent dividend, provided an annual surplus of some millions of dollars. The financial showing of the Canadian National Railways was particularly gratifying and resulted in the largest operating surplus yet recorded, and bringing within measurable distance the time when the National's earnings will be sufficient to also take care of all interest charges.

From the position occupied a few years ago of being seventh among the nations as an exporting country on a per capita basis, Canada's last year achieved second place, and at no time since war activity ceased has industry and trade generally been so promising or expanding so satisfactorily. All the annual meetings of Canada's largest corporations and institutions have heard the same story of betterment taking place last year, and with even brighter prospects for 1926.

During the past two weeks the Western Grain Pools paid out over \$27,000,000 in cash to the farmers of Manitoba, Saskatchewan and Alberta as a further payment on account of their 1925 crops, a truly enormous sum of money to be placed in circulation right at the outset of a new season's operations.

This huge second payment helps one to realize the fact that the cash value of wheat delivered by farmers at country stations during the four and one-half months, August 1 to December 5, 1925, was \$338,300,000, or an average of \$1200 per farm, with 55,000,000 bushels still to be marketed. Not only is this a new record, but in addition to the \$72,062,000 of this year's crop, preceding twelve months by no less than \$50,000,000, and was \$35,000,000 greater than 1922-23, \$80,000,000 greater than 1922-23, and \$130,000,000 greater than 1921-22.

During 1925 a larger acreage of farm lands was sold in the three Western Provinces than in the three years of 1922, 1923 and 1924 combined, and practically all direct to hand users. In addition to the 672,062 acres this year sold by companies, homestead entries totalled 625,510 acres, or a total of 1,297,572 acres taken up last year.

These are but a few of the basic reasons for the increased development and progress which may be confidently expected this year. The effect is already noticeable in increased building activity all over the West which now promises to surpass anything witnessed for a considerable number of years past, and in the expanding operations of most big industrial concerns in the East.

Another evidence that new created wealth will find its way into channels leading to development and greater business activity is found in the fact that during the past couple of years the indebtedness of Western municipalities, school districts, and other public and semi-public bodies has been largely decreased, and new wealth instead of going to liquidate old debts will be available for new undertakings and progressive development. In Saskatchewan, for example, the Local Government Board report for 1925 states that many municipalities and school districts have cleared themselves of all debenture indebtedness so that the tax rate can now be materially reduced and all current revenues devoted to constructive and maintenance purposes. It is further stated that the amount of debenture indebtedness repaid during 1925 far exceeded the amount of new capital loans made.

With the opening of spring activities in all branches of human endeavor in Canada, and particularly in the West, the situation is most hopeful and more encouraging than for a decade. Nothing in the nature of the old-time booms is looked for, and certainly is not to be desired, but it is quite apparent that the time is opportune for the progressive, far-seeing, honest man on the farm or in town or city, to draw away from the more conservative policy which the past few years, and generally unsettled conditions, forced upon him and move forward in a larger, more vigorous policy. The opportunities which 1926 offers should not be ignored nor neglected.

**Criminals Use Plastic Surgery**  
Through the recent capture of a burglar who had his facial appearance altered by plastic surgery, attention was called to the increasing use of plastic surgery by criminals to escape identification. On the prisoner was found a receipt for \$20 paid to a surgeon for changing the contours of his ears, chin and nose.

The wise man not only lets his wife have the last word, but he is tickled to death when she reaches it.

You never will realize how frail and mortal a great man is until he gets interviewed on religion.

**Miller's Worm Powders** act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a home in strengthening the infirmest stomach, and maintaining it in vigorous operation, so that, besides being self-evident verifiers, they are tonic and health-giving in their effects.

A barber in Wichita, Kas., has his shop in an auto and cuts in his trade when needed.

The objection to broadcasting heat will be the occasional cold chills when there's static.

## Canadian Mining Men Get Together

Leaders in Canadian Mining Affairs Meet in Montreal

A pronounced feeling and expression of optimism, both as regards the present standing and future development of the mining industry in Canada characterized the twenty-eight annual general meeting of the Canadian Institute of Mining and Metallurgy which held a three-day session at Montreal. The meeting which brought together leaders in Canadian mining affairs from one end of the Dominion to the other was signalled by the fine spirit of co-operation shown to exist between Federal and Provincial Governments, the Institute and private mining concerns in all that concerns the Dominion's mineral resources, assuring for the future a development along the soundest national lines.

The meeting, which was welcomed by Mayor Duquette, initiated its session under the presidency of T. J. Brown, deputy minister of mines, Nova Scotia, and closed them under the direction of the 1926 president, Louis Stockett, general superintendent of coal mines, department of natural resources, Canadian Pacific Railway, Calgary. Among the distinguished visitors in attendance at the convention were Hon. Charles Stewart, minister of the Interior; Hon. Chas. McCrea, minister of mines, Ontario; Hon. J. E. Perreault, minister of colonization, mines and fisheries, Quebec; Chas. Caswell, deputy minister of mines, Ottawa; Thomas W. Gibson, deputy minister of mines, Ontario; Col. J. S. Dennis, Canadian Pacific Railway; Thos. Dennis, superintendent of mines, Quebec; J. L. Agnew, president International Nickel Corp.; Dr. W. Lingen, Massachusetts Institute of Technology; and J. E. Spar, editor, Engineering and Mining Journal Press.

In the course of the sessions a number of papers were read covering the wide range of Canadian mineral resource and frankly discussed. Charles Caswell discussed mining development in Canada in a broad way, sketching its past and venturing to forecast its future. He showed how upon the base of mineral exploitation a host of dependent industries might be built, including the development of the industry in British Columbia in particular which he believed would be reproduced in Northern Manitoba, Ontario and Quebec. The matter of mineral statistics, their compilation and value, was ably dealt with by S. J. Cook, of the Dominion bureau of statistics and the provincial statistics of Ontario, Quebec, British Columbia, Nova Scotia and New Brunswick.

The scope of the many papers read by experts in their particular lines was very wide, covering practically the entire field of Canadian mineral resource and its development. In addition to the many technical problems brought up for discussion the lead, zinc, nickel, petroleum and natural gas deposits of the Dominion were found to merit special papers, whilst the new gold fields of Goudreau and Red Lake were described and endorsed by engineers specially familiar with the regions. The new Quebec gold field of the Rouyn revealed its depth of attention in no less than three papers, and gold mining in Nova Scotia was treated very ably in another. An interesting paper on the Manitoba limestone deposits was read by H. E. Lamond, of the development branch of the Canadian Pacific Railway at Winnipeg.

The sessions of the convention were marked by full attendance and ardent attention to proceedings, the only deviation being a visit to the plant of the Imperial Oil Company at Montreal East. An outstanding feature throughout the convention was an exhibit in the hall of mineral products from the various fields of the Dominion, and of coins manufactured from Canadian nickel from Switzerland, Italy, Hungary, France and Australia. The convention concluded with a banquet at which speeches were made by Hon. Chas. Stewart, Hon. J. E. Perreault, Hon. Chas. McCrea, Hon. L. H. Garrison, and Col. J. S. Dennis, all of whom treated some phase of the mining industry in a manner characterized by extreme optimism, and an expressed recognition of its present place in Canadian life and the part it would play in the future development of the Dominion.

**The Sheep Industry**  
It is estimated that forty thousand lambs, or twenty-five per cent, more than last winter, are on feed or have been finished and sold in the Lake and Calgary districts. One company has 10,000 head fattening on screenings at Calgary.

If a cooper can't make a barrel of fun, he can at least have a slaving good time trying.

## AFTER ALL There's Nothing To Equal Cream Bank FOR THE SKIN!

### New Minaki Map

Covers Hunters and Tourists Paradise in Ontario and Manitoba

The new Minaki map just issued by the topographical survey, department of the Interior, and available to the public covers a tourists and hunters paradise.

It has been said that Canada's third largest export is scenery. Many millions of dollars are being spent annually by this country by Americans and other tourists and while, in the area covered by this map lying partly in Ontario and partly in Manitoba, there are already well established summer resorts frequented by Winnipeggers and others, the possibilities of the region have hardly been scratched.

The map covers a maze of lakes and waterways where travel is exceptionally difficult without the aid of a reliable map. There are many interesting canoe routes and the map shows the portages, falls and rapids. One of the routes leads towards the new Red Lake mining field.

Included in the area are such well known resorts as Lake of the Woods and Sand Lake where there are innumerable pretty islands each with its summer cottage. On these lakes and the Winnipeg River there is unrestricted navigation for motor boats for upwards of one hundred miles.

The country north of Minaki is famous as one of the best hunting grounds for moose and deer, and duck and geese also abound. The fishing is also of the best.

### Through Service For Steamship Passengers

Canadian Pacific Railway Inaugurates Through Tourist Sleeping Car Service

For the convenience of western passengers enroute to the Old Country, the Canadian Pacific Railway have inaugurated a through tourist sleeping car service from Winnipeg to Saint John, N.B.

These cars will leave Winnipeg on "The Imperial" at 10:00 a.m. every Tuesday until April 26th, providing through service to the ship's side at Saint John.

This service will prove extremely popular with passengers from the prairie provinces, eliminating as it does, changing trains at Montreal.

Love may make the world go round, but it makes young men's arms go round waist plates.

Nova Scotia produces about 2,000,000 barrels of apples annually.

## Canada Should Keep Militia

Has Large Territory Which Needs Protection Says Sir Arthur Currie

As a nation, with her signature affixed to two treaties to undertake serious obligations, as a member of the British empire which called her to do her part in maintaining empire integrity, and as the possessor of large territory which required protection in an armed world, Canada should maintain her militia which had always stood her in good stead, Sir Arthur Currie told the Canadian Club at Montreal.

"It seems to me," Sir Arthur proceeded, "that Canada cannot withdraw into a position of isolation in regard to foreign affairs. She has obligations under the most solemn covenant and the greatest covenant that the nations of the world have ever signed, and she cannot shut herself up in North America."

### Distribution of Fish Fry

C.P.R. Furnishes Free Transportation For Fish Eggs and Fish Fry

Distribution of fish fry from the federal hatcheries during the past year totalled 700,000 in number, according to a report of the department of marine and fisheries. Of these, whitefish and rockery salmon make up the great majority, while the many other varieties of salmon and trout nearly equal up to the remainder. The Canadian Pacific Railway was actively connected with this movement, having furnished transportation for shipments of fish eggs and fish fry, with their attendants, free of charge.

### "DIAMOND EYE" ANY GARMENT, DRAPERY

Just Dip to Tint or Boil To Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades of rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hairnets, everything!

Buy Diamond Dye—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Why Torture Yourself? As we get along in life most of us experience rheumatic and other pains, consoled ourselves with the knowledge we are no exceptions to the general rule. Instead of carefully investigating the cause of the pain, as we naturally would if a horse, cow or dog were the sufferer, we grin and bear it, or if it gets too bad, get something to relieve it for a while. If however, we candidly admit the fact of our own pains and ninety-five per cent of those of other people are caused by the wrong foods we eat and are regularly eating, whether we require food or not, an enormous amount of suffering could be avoided by mending our diet.

Many, out of all creation, destroy, by cooking and refinement, his food. Most of the deadly diseases, including cancer and rheumatism, are caused by potassium deficiency in the sufferer's systems, and the fact that, in advanced cases of the two named maladies, it is almost impossible to detect differences between blood samples from each under a high powered microscope, emphasizes the original cause of both. Yet, in apparently hopeless cases of both these and other diseases of similar origin, if the potassium deficiency is remedied, the malady will retrograde until, with the elimination of poisons from the blood under hono treatment and sane diet, those who will thus help themselves can win back their health and prolong their lives. Threatened by rheumatism with crippled and cartiled existence, the writer, on his birthday his sixteenth birthday, acted on the above simple directions and, freed from pain and fully enjoying life, heartily wishes a like relief to other sufferers. Charles Weller, St. Bruns- wick, Ave., Toronto.

**The First Sandwich**  
Years ago there was a certain Lord Sandwich who was so fond of playing cards that he did not care to stop either for sleep or for meals. However, men must eat, so, to save time, he ordered his servants to bring him a piece of meat laid between two slices of bread, so that by eating it he should not grease his fingers and soil the cards.

If you are unable to finance a trip to a winter resort you can have just as much fun ridiculing the wealthy loafers that do.

Minard's Liniment for colds

## Good for All the Family

It makes them smile—it's sure worth while.

# NABOB'S TEA

"Tea as it should be"

### Mountain Park Popular

Barff National Park Attracts Many Visitors Each Season

Attendance at Barff National Park in the Canadian Rockies broke all records in 1925. The park revenue amounted to \$140,000 during the season, and more than 67,000 people registered at the hotels. Nearly 80,000 people passed through the east entrance of the park alone, which was 47 per cent greater than the previous year.

National parks to the number of 16 are under the administration of the Canadian Government and cover an area of 2,247 square miles in different parts of Canada. They are great playgrounds—wonderlands of forests, well stocked streams and lakes, glaciers, hot springs, waterfalls and mountains. All national parks in Canada are sanctuaries for wild fowl, mountain sheep, goat, moose, bear and other animals.

**Cause of Asthma.** No one can say with certainty exactly what causes the establishing of asthmatic conditions. Due from the throat, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except by a careful and sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

She (enthusiastically): Oh, I would have given anything in the world for that.

He: Well, why didn't you buy it? She: Buy it? Why, the man wanted five dollars for it."

## AFTER SHAVING

Mildred Minard's on-half with cream or sweet oil, and apply to the face. Very soothing and refreshing.

**BAKERS' OVENS**—Write for data and prices to the nearest agent. Hubbard Oven Company, 1100 Queen West, Toronto.

### LEG SORES

ARE QUEALING. If you suffer from Leg Sore or Varicose Ulcers, I will send you absolutely FREE a copy of my booklet, telling how to be rid of these troubles for all time by using my new method. It is the only method known to cure Leg Sore, Varicose Ulcers, and all other troubles of the legs. Simply send your name and address to Dr. J. C. WATKINS, Room 23, 411 East 11th Street, Kansas City, Mo.

THE WORLD'S BEST REMEDY FOR THE KIDNEY AND BLADDER TROUBLE

300 4

**Genuine BAYER ASPIRIN**

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago  
Pain Neuralgia Toothache Rheumatism

**DOES NOT AFFECT THE HEART**

**Safe** Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoclonic-acid of Salicylic Acid (Bayer's Aspirin). While it is well known that Aspirin means Bayer manufacture, to avoid the public confusion, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

## TAKE STEPS TO HALT SMUGGLING INTO CANADA

Ottawa.—Tentative plans to stop smuggling into Canada were outlined in the House of Commons by Hon. J. H. Bolvin, minister of customs and excise, when the estimates of his department were under consideration. While these arrangements were under his consideration, Mr. Bolvin emphasized that it was his desire and intention to carry out whatever recommendations were made by the present customs inquiry committee.

The special preventive service force, he declared, which had been authorized last year and an appropriation of \$350,000, was not operating satisfactorily. Forty men out of 67 now engaged would be dismissed, and a force of approximately 260 men established. Fifty-five men are approximately would be allotted to Nova Scotia, 20 to New Brunswick, 10 to Prince Edward Island, 50 to Quebec, 51 to Ontario, 10 to Manitoba, 13 to British Columbia, and a certain number to Alberta and Saskatchewan.

This preventive force would not be entirely engaged in patrolling the boundary points, but would also be employed in guarding junction points. His idea also was to group two or three men at important junction points coming into Canada. An increase in the number of boats performing patrol work on the Atlantic and Pacific coast would also, in his opinion, be a proper step.

### Col. Coolidge Passes

Father of President of the United States Dies in His 81st Year  
Plymouth, Vt.—Colonel John C. Coolidge, father of the president, is dead.

Within two weeks of his 81st birthday, Colonel John had been sinking gradually since he suffered a severe heart attack a week ago.

History reserves a separate niche for John Calvin Coolidge, for to him came the thrill, experienced as yet by no other man, of inaugurating his own son president of the United States.

By the light of a little oil lamp he stood, this quiet, gaunt man of Vermont, and administered the oath that made his boy Calvin in the nation's 29th chief executive. That was on August 3, 1923, and the time was 2:30 in the morning.

Immediately he flashed into national prominence. Word went out of Plymouth that Colonel Coolidge, a justice of the peace, had administered the presidential oath on the Coolidge family Bible by the dim rays of a kerosene lamp—and his was the greatest glory a father ever knew.

### Would Change System

Motion to Do Away With Cabinet Ministers Having to Seek Re-election

Ottawa.—Cabinet ministers will not be required to seek re-election when accepting cabinet position, if a motion placed on the order paper by A. E. McLean, Liberal, Prince, is given effect.

Mr. McLean's proposal, for which he will ask the approval of the house, will undoubtedly cause considerable debate.

Mr. McLean, in his motion, points out that "the British Government, the mother of parliaments, has this session introduced a bill making it unnecessary for cabinet ministers to seek re-election when accepting cabinet positions, which has now passed the British House."

"The adoption of a similar practice in Canada, he states, 'will not in any way endanger the stability of our parliamentary institution, which every true Canadian desires to jealously safeguard.'"

### Want New Railway

Charter Will Be Asked For Line Through Red Lake District

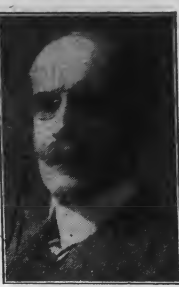

Ottawa.—Parliament will be asked at the present session to grant a charter for a railway from Quibell, Man., through the Red Lake district to a point on the Hudson Bay division of the Canadian National Railway near The Pig. Man.

The bill for incorporation is now being drafted. The name proposed is the Red Lake and Northwestern Railway Company.

Will Attend Forestry Convention  
Victoria.—P. Z. Caverhill, chief forester of the Provincial Government, will leave here for Europe this week to represent British Columbia at the first world congress on forestry in Rome, April 29 to May 5.

W. N. O. 1621

### Prominent Financier Passes

W. R. ALLAN

Well-known Canadian financier and president of the Union Bank of Canada, who died at his home in Winnipeg.

Death Of W. R. Allan  
Winnipeg.—W. R. Allan, former president of the Union Bank of Canada, died at his home here, Mr. Allan, who was 62 years of age, had been in poor health for some time. He had been confined to his bed for several days with a threatened attack of pneumonia, and while his illness was generally known, it was not considered particularly serious. He was one of the best known Canadian financiers.

Considerable time was spent in discussion of a resolution put forward by the government asking that the Dominion assign to the province the power rights on the Spray Lakes site, with the option of the province developing power themselves, or controlling development by a private company. The Spray Lakes site is within the Banff National Park area, and for that reason there has been considerable objection to any development work there, but the government resolution stated that the work would not in any way affect the scenic beauty of the park.

An amendment was brought forward by the opposition, couched in some what similar terms to the government resolution, but calling for the ownership of the Spray Lakes site by the province.

The resolution passed by a 25-9 majority. Premier Brownie also announced the opposition for wasting the time of the house by an amendment almost the same as the government resolution.

A marked improvement in school attendance throughout the province is indicated by figures submitted by the minister of education, Hon. Percival Baker. The number of children of school age who did not receive one hundred days of schooling in 1925 was 36,145, as compared with 60,641 in 1920.

School grants paid in 1925 totalled \$1,018,342.47 as compared with \$920,922.52 in 1920.

For some days past the house had been working on the details of new Insurance and Municipal Districts Act. The Insurance Act is designed to bring the law governing companies into closer conformity with similar laws in other provinces. It contains 497 clauses, but these are principally non-contentious.

The Municipal Districts Act contains over 400 clauses. Most of these are also non-contentious, but discussion has arisen over those clauses which make property qualifications imperative for councillors and voters. Labor members point out that a man could be elected premier without property qualifications, but not to membership of a municipal council.

The other main argument was on the Indignants question, some members insisting that the government take over the care of Indignants, while the majority of municipalities maintained that Indignants could be more sympathetically, efficiently and economically handled by local organizations.

Forming Nobility Colony  
Winnipeg.—As a result of the efforts of the Canada Colonization Association, Manitoba is developing a colony of Hungarian nobility. Four families of the Hungarian nobility have purchased farms adjoining each other.

### Japs Demand Apology

Formal Apology From China Is Required But No Force To Be Used

Tokyo.—The cabinet has decided to instruct Kono Yoshiwasa, Japanese minister at Peking to demand from China a formal apology to the Japanese flag, the punishment of guilty Chinese and the indemnification of the wounded for the action of the Kuo minchun (National army) troops in firing upon two Japanese destroyers in the Pei River last week when one Japanese officer was killed and several wounded.

Minister Yoshiwasa was instructed to negotiate the details for the carrying out of the demands and to make them as lenient as possible.

It is said that no matter whether China accepts the responsibility or not, Japan does not intend to resort to force, but if no agreement is reached, might take the matter up to the world court. It is pointed out that a friendly and peaceful result is Japan's main idea.

### Should Use Empire Products

Prince Urges Britain To Purchase Canadian Timber

London.—The Prince of Wales, presiding at the opening of the general meeting of the Empire Forestry Association, said that considering what excellent timber of every kind the empire produced, it seemed rather unfortunate that the United Kingdom should be dependent on foreign supplies.

Out of £16,000,000 worth of lumber imported last year, His Royal Highness said, only 12 per cent. was of empire production.

The Prince appealed to the large users of timber, such as railway companies and builders, when placing their orders to remember that Canada produced the finest soft wood timber in the world.

## BRAZILIAN VETO KEEPS GERMANY OUT OF LEAGUE

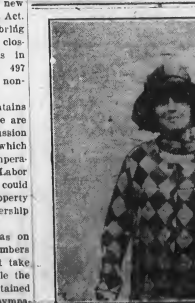

Geneva.—The assembly of the League of Nations ended its labors and the principal object for which it had been convened remained unaccomplished. Germany's election to the league has been postponed until the September session, and, necessarily, Germany has been compelled to forego the honor of a permanent seat in the league council. After ten days of negotiations, Brazil maintained her decision, to veto Germany's election unless she herself was accorded a permanent seat in the council.

When the assembly met, Senator Molloy of France announced Brazil's decision and immediately Sir Austen Chamberlain, the British foreign secretary, proposed postponement of Germany's election until the fall.

Italy alone, of all the great powers, represented permanently in the council, refrained from joining in the expression of regret that Germany had to content herself outside the league for the time being.

This silence of Mussolini's spokesmen was the outstanding subject of comment in Geneva, when all men were plainly worried about the future of the league, because it was clear that setback would be very difficult to overcome.

The council, in secret session, immediately attacked the problem of revision of the statutes of the league. It decided upon the immediate appointment of a special commission to probe the entire problem.

### The "Bull of Bashan" in Canada

Field Marshal Sir Edmund Allenby, the conqueror of Palestine and the deliverer of the Holy Land from the hands of the modern Crusader who has achieved what had not been done since the Crusades, landed at Victoria recently from the S.S. Ararat, which has come from Sydney, New South Wales, and touched Honolulu enroute. His landing is known because of his thrusting offensive in the war as the "Bull of Bashan" and is now making a trip across the Dominion. Photograph shows Lord Allenby and Lady Allenby.

## BANK DEPOSITS OF MR. BISAILLON RATHER HEAVY

Ottawa.—Questions put to J. E. A. Bisailon, former chief preventive officer in Montreal, by Hon. H. H. Stevens, during the progress of the customs investigation drew protest from Oscar Gagnon, counsel for the witness.

Mr. Bisailon had testified that he had abandoned the liquor business on the thirtieth of April, 1921. As an official of the customs department, his salary had not been higher than \$2,500 a year in any of the years following that date up to the time of his dismissal.

Mr. Stevens produced a record of deposits made by Mr. Bisailon in the four years, 1921 to 1924, inclusive. He asked the witness to explain how it was that, while earning this moderate salary, he had been able to deposit \$4,951 in 1921, \$1,909 in 1922, \$7,389 in 1923 and \$14,812 in 1924.

It was at this point that Mr. Gagnon intervened. He claimed that the witness should not be required to answer such a question unless he was given access to his own books and records. Mr. Bisailon said that the deposits referred to could be explained quite easily, but he must have time to examine his books.

"I object to this question," Mr. Gagnon said when Mr. Stevens asked for an explanation of the deposits. "You are examining my client on a document which he has not seen and without giving him an opportunity to examine it."

"You are treating him as an accused person when he is here as a witness," Mr. Gagnon claimed that the question was illegal and did not come within the law of evidence.

### Boom In Agriculture

Big Development Expected in Western Canada in Next Few Years

Seattle.—Prediction that the next five years will witness the greatest agricultural development in the history of Western Canada was made here by R. C. W. Lett, Edmonton, who is returning to Canada from a tour by the Pacific coast states during which he visited all the large cities of California.

"Canada is the greatest market of the United States and the returning prosperity of Western Canada means a greater market for the United States," the farm product in Canada has been, and is, much the same as that of the United States. Since 1915 there has been an agricultural depression that is gradually disappearing. The report of the soldier settlement in Canada got back on their feet and now their outlook is for an era of good times.

### Wanted Conference Next Year

Canadian Government Favored 1927 For Calling Imperial Parley

Ottawa.—The Canadian Government was in favor of calling the Imperial conference in 1927 instead of next October.

This is revealed in the correspondence between the Baldwin Government in London and the Government-General in Ottawa, tabled in the House of Commons.

Premier Baldwin, however, having intimated that the other dominions preferred to meet next October, and the British Government shared this view, the Canadian Government immediately decided to call the conference for October of this year, and His Excellency cabled this decision to London.

### Cannot Lower Freight Rates

HON. CHAS. A. DUNNING

Minister of Railways and Canals, who says that there can be no general reduction in freight rates at the present time.

### Seek Platinum In Slave River District

Report of Find Has Not Yet Been Confirmed

Edmonton.—A staff correspondent as his opinion that the people of the Edmonton Journal who has made a special trip to the scene of the reported gold and platinum find in the Slave River near Fort Smith, says in a wireless dispatch from Fort Smith, N.W.T.:

"Company officials scout the idea of our time to get back at the east." He had only one answer to that sort of thing to add to previous statements of that it is only a prospect. The lead, which occurs between a limestone and a granite contact, is being strapped less true that two wrongs don't make a right. I don't believe it is possible to build up a united nation by repaying injuries with injuries. If that way people are killed, not united."

It was the turn of big, unbridled people in the west to demonstrate to the rest of Canada that they viewed the country as stretching from the Atlantic to the Pacific when it came to solving problems he added.

### Fewer Veterans Are Settling On Land

Soldier Settlement Board Reports Big Decrease Last Year

Ottawa.—The number of soldier settlers established on the land in Canada with loans advanced by the Federal Government is decreasing rapidly. The report of the soldier settlement board of 1925 shows that 237 veterans were settled in this year, compared with 720 in 1924, and 1,153 in 1923. Regulations adopted in the 1924 session of parliament limit the benefits of the Soldier Settlement Act to those who made application prior to March 31, 1924.

To date a total of \$106,756,831 has been advanced to soldier settlers, plus interest paid charges of \$6,312,163. Of this amount \$40,807,973 was advanced for Indian soldier settlement.

"There is intense excitement at Fort Simpson, where the Indians have discovered an outcropping of coal on the reserve. The whole property has been leased and steps taken to record it. No work on it has yet been done, but the Indians are very hopeful. The whole of the United Church Mission property is included in the blocked out area."

### Indians Dream Of Wealth

Excited Over Coal Find On Simpson Reserve in B.C.

Vancouver.—A special dispatch to the Province from Prince Rupert, B.C., says:

"There is intense excitement at Fort Simpson, where the Indians have discovered an outcropping of coal on the reserve. The whole property has been leased and steps taken to record it. No work on it has yet been done, but the Indians are very hopeful. The whole of the United Church Mission property is included in the blocked out area."

Port Simpson is on the British Columbia coast at the mouth of the Skeena River, south of Prince Rupert.

### Bay Ling Motions Dropped

Ottawa.—Two proposed resolutions supporting the immediate construction of the Hudson's Bay Railway, and placed on the order paper by Progressive members, were dropped in the house at the request of their sponsors, when orders of the day were read.

The resolutions had been proposed by John Miller (Progressive, Qc/Ap), and John Evans (Progressive, Rosemont).

Will Visit Victoria This Spring  
Victoria.—In announcing details of a two weeks' sojourn on Vancouver Island this spring planned by Baron Byng, governor-general of Canada, and these bonds had found their way into the boxes of the confederates who ought to contribute to public revenue, instead of remaining in the hands of the average citizen who purchased them. Whenever the question of taxation was discussed, it was impossible to evade the fact, said Mr. Robb, that Canada had committed herself to certain expenditures and liabilities during the war, and these liabilities were not as yet paid off, and that they would continue to be a charge on the public of Canada for many years to come.

Has 72nd Operation  
Baltimore.—Dr. Frederick Henry Bantler, Roentgenologist of Johns Hopkins Hospital and Medical School, and one of the most famous radiologists in America, underwent his seventy-second operation as a result of X-ray burns.

THURSDAY, MARCH 25, 1926

SCRIPPS WAS  
CONSISTENT.

Nearly three years before his death, Edward W. Scripps, one of the great figures in American journalism, gave orders that in the event of his passing his body be buried in the sea without communicating with his relatives. Why not? Scripps loved the sea, and spent a greater portion of his retired life in cruising its waters. Many people dislike the idea of a watery grave because it can not afterward be identified. Yet whatever this or any other man may have accomplished will be marked by the records of achievement left, not by a shallow tomb of engraving on stone.

Some people are needlessly worried these days about the Progressives dominating things at Ottawa; they are all human and surely as sane in judgment as Dewitt Foster, Bob Rogers or R. B. Bennett. The Progressive are all vitally interested in Canada's welfare.

Some worthy Conservative who really wants to see his party get somewhere ought gently but firmly suggest a change of tactics, or strategy, or leadership, or something, to his political friends at Ottawa—Toronto Globe.

They have been celebrating the anniversary of the telephone. May be it was the anniversary of the time they tried to call the number they're still trying to get.

Lighting it out will save many a fighting it out.

To avoid the idling mob, Mary Pickford can't go down town shopping like other women. But look at the signs she saves by not having to look into the store windows at the things she couldn't get if she could go down town shopping.

It is said that people leaving Florida receive a manicule at the border so that the State's richest asset will not be smuggled out under the mails.

It would be both history-making and prudent for the Prince of Wales to exclaim, "My kingdom for a horse that won't throw me down!"

We're expecting at any time to see someone dig up an old blue law that prohibits saying there isn't any Santa Claus.

Even if red flannel underwear does come back it won't be safe for the modern girl to walk through a bull pen.

It generally takes a car with a lot of fresh paint to attract a fresh girl with a lot of paint.

## Duty on Motor Cars

Within the next few weeks the question of reducing the duty on motor cars coming into Canada, will probably be under discussion and it is well that the people should begin to think about it, and to consider without prejudice the effect of it.

At present the duty on motor cars is 35 per cent. In addition there is a sales tax which is added to the car. Canada spent last year in new motor cars the large sum of \$70,000,000, of which \$9,600,000 were imported. A comparison of the prices paid for motor cars in Canada and in the United States shows very clearly that the manufacturers in Canada, who for the most part are Americans, charge for the cars of the United States prices plus the 35 per cent duty.

As not one car in seven is imported from abroad, it is evident that this duty is not for revenue purposes but for the purpose of protecting the Canadian industry.

But is not the home industry worth preserving, is the question that some protectionists may ask. The answer to the question is found in the trade returns, which records the export of motor cars manufactured in Canada at \$26,000,000. All of these figures refer to last year.

A large portion of the cars made in Canada are for export, where the Canadian manufacturer has to meet the competitor on even terms. If the Canadian manufacturer can meet the U. S. on even terms in the foreign market, he can meet the U. S. manufacturer on something better than a 35 per cent preference.

That in brief is the issue on the reduction of the tariff on motor cars.—Calgary Albertan.

## SETTLERS FOR WEST ARRIVE BY C.N.R. SPECIAL

THE first week of March saw the arrival of the advance guard of the heavy movement of immigrants to Canada anticipated for this spring, when six hundred Britishers and Europeans arrived at Winnipeg en route to their destinations in British Columbia and the prairie provinces. This number, arriving in the evening by special and regular Canadian

National trains, were immediately re-decked and the majority left the same night for their new homes. A party of fifteen English boys ranging from 13 to 17 years of age shown grouped around the engine that brought the immigration special into the Canadian National depot. Good homes on farms for each of these sturdy young lads had already been arranged by Captain

T. Smith, of the Church Army Distributing Home, Winnipeg, who is shown near the centre of the group. Below, at the left, is a typical group of rugged Central Europeans, several hundred of whom were included in this contingent of settlers. At the right, three little new Canadians were delighted to have their pictures taken on top of the family baggage.—C.N.R. Photos.

# No Enduring Security Can Be Found In Armaments And In Separate Alliances

Edward Grey's conclusions are real, and they have the substance of common sense from a man who knows, and who has been through hell for his wisdom. He does not see any hope in the "new diplomacy" for that may be just as dishonest as the old. Nor does he linger over the distribution of "war guilt," though he believes that Prussian militarism was the precipitating agent for the debacle. He regards of Germany, he says:

"With Europe an armed camp, could peace have been preserved much longer? Every country had been piling up armaments and perfecting preparations for war. The object in each case had been security. That had been precisely the contrary of what was intended and desired. Instead of a sense of security there had been produced a sense of fear . . . and fear predisposes to violence and catastrophes."

He goes on to show that "the notion that Germany can be kept permanently alarmed by temporary expedients, such as foreign misdeeds of control, is an illusion. In the long run there can be no security in Europe without a Germany that is genuinely working for peace, but it remains for the victors to start on the better way and give Germany a chance to join."

"The lesson of European history is so plain. It is that no enduring security can be found in competing armaments and in separate alliances. There is no security for any power unless it is a security in which its neighbors have an equal share."

"That is the high note in Lord Grey's book. It was written before the signing of the League of Nations, but it might have been the charter behind them. How then in this lesson to be applied? Partly by good will and partly through the solemn realization that unless man can learn by his experience he will perish."

"War used to imply a contest between armies; it will henceforth by common consent mean the destruction of the economic order of the crowded cities of population; it will mean physical, moral and economic ruin. . . . There will be no secure peace until the great nations of the world have a complete feeling of confidence among them sufficient to inspire confidence that they will stand by each other to avoid, to suppress, or to localize and isolate war."

He believes that though England and her dominions are at the League of Nations and the United States refuses to join, yet public opinion is in fact deeply concerned and slowly grasping the truth that competition in armaments does not lead security. The next step is the realization that a sense of security will require armaments. Then the final problem will be faced, how to produce this confidence feeling of security. "The solution of this problem is the supreme need of civilized mankind."—From a Review of Lord Grey's "Twenty-Five Years" in the Survey.

## Toronto's Big Fair

Canadian National Exhibition Now Approaching Impartial Status—Indications that the Canadian National Exhibition is approaching an impartial status and forecasts of an attendance of two million people at future fairs, were features of the annual report of the exhibition's executive. "The trend toward empire or world fair proportions," the report said, "was never more clearly defined than at this moment, when we have requests before us for space from such distant parts of the British commonwealth as India, Africa, Gold Coast, Barbados, Honduras and New Zealand, while such countries as Mexico, Colombia, Czechoslovakia and Switzerland are also asking for space. There is not sufficient to provide the amounts requested."

**Good News For British Navy**—"Salt Jack," otherwise salt pork, which has been an important part of the British navy's rations for centuries, has been banished by an order of the admiralty. It is announced that no salt pork henceforth will be served on British warships. Canned meats and canned vegetables are to take their place as rations for food. The fresh articles are not available.

**Forgot At The Source**—"What's that piece of cord tied round your finger for?" "My wife put it there to remind me to post her letter." "And did you do it?" "No; she forgot to give it to me."

W. N. U. 1621

## Strength Of Western Wheat Pool

Glasgow Herald Says It Is The Biggest Selling Agency In The World. The Glasgow Herald, commenting on the government's proposal to grant £1,000,000 for the encouragement of empire trade, says:

"It is something of a paradox that while the government proposes to spend £1,000,000 to assist the growers and producers of the dominions to market their commodities here, many of our importers apparently are already well supplied with the marketing power already possessed by important sections of empire producers."

The Herald proceeds to cite the Western Canada wheat pool as an important example of acquired power and strength, but says: "New Zealand was the pioneer in forming wheat pools and was soon followed by Australia."

"The ruinous prices obtained for the record wheat crop of 1923," the Herald continues, "may be said to have been the provocation to action by the dominion wheat producers, yet so swiftly has Canada adopted the pooling idea that its wheat pool already ranks as the biggest selling agency in the world."

The Herald says certain pools will make mistakes and will require to learn from experience. "The Canadian Wheat Pool," it adds, "may find that values can fall as well as rise for the latter portion of the crop. Criticism at all events had better be suspended."

The Herald concludes by saying, "We believe a new form of marketing is a necessary experiment. If it succeeds it will undoubtedly tend to the stability of Western Canadian agriculture and will accelerate land settlement, increasing production, which will ultimately be to the consumer's advantage."

## Registered Seed Grain

Over Fifty Per Cent. of Registered Seed Grain Grown in Saskatchewan.

Over 50 per cent. of all registered seed grain grown in Canada, was produced in Saskatchewan last year. Seed cleaning machinery was installed at Moose Jaw in the fall of 1923 by the Registered Seed Growers' Co-operative Association and between January, 1925, and before seeding time of the same year, about 55,000 bushels of registered grain and over 200,000 lbs. of clover were cleaned and marketed mostly to Saskatchewan farmers. The season of 1925-1926 is expected to be more favorable, as the organization in addition to grain and clover, is handling bromo grass, rye grass and corn.

## Must Be Busy Man

I have been in your service in a great many ways for 11 years. I feel that you ought to appreciate it. Remember your clothing will need cleaning and pressing. Also that your hair will need cutting, or you will need a nice, clean shave. Don't forget to give your face at my restaurant. Old cases and tubes vulcanized. Automobile truck for hire.—C. E. Jones, Brookline, Va., Union.

**Lumber Industry Important**—Province of British Columbia Now Supplying World. British Columbia's lumber history was dealt with in an address by Ralph S. Plant at the Optimists' Club when he spoke of the industry as being the second most important in Canada and the one which supplied the railways with their largest source of income. He characterized the history of lumbering in British Columbia as a story of romance and daring, and pointed out how the province today was supplying the world.

**Interesting Find of Russian Explorers**—Imbedded in ice a party of Russian explorers discovered the remains of an extinct animal believed to have died 50,000 years before the birth of Christ. The skin was so perfect that it was easily removed. Some of the hairs measured thirty inches. An analysis of the stomach contents revealed the grass and flowers of the same types which grow in Northeastern Siberia today.

**Pulp From Straw**—The Elmwood Pulp and Paper Company, which has acquired a site in St. Boniface, will not be in the newspaper business. Its object is a straw pulp mill with a capacity from 35 to 40 tons output daily. According to a statement issued here by T. F. Polmar, the company also proposes to install machinery for manufacturing pulp out of straw.

**Vancouver Grain Accommodation**—Vancouver was never so well equipped to handle a large flow of grain as today. Five elevators with a capacity for accommodating 205,000 bushels per hour or 4,100,000 bushels daily in the aggregate. About 50,000,000 bushels of grain, it is anticipated, will pass through the port during the present season.

Always tell the truth and you will never have to fix up excuses.

## Improved Farm Lands

Average Value of Occupied Farm Lands For Canada As a Whole. The average value of occupied farm lands for Canada as a whole, including both improved and unimproved, as well as dwelling houses, barns, stables and other farm buildings, was \$25 per acre in 1925, as compared with \$23 in each of the two preceding years, according to a report of the bureau of statistics. By provinces the averages are as follows, with the preceding year's values given in brackets: Prince Edward Island, \$46 (\$40); Nova Scotia, \$27 (\$23); New Brunswick, \$34 (\$31); Quebec, \$34 (\$25); Ontario, \$67 (\$65); Manitoba, \$29 (\$25); Saskatchewan, \$24 (\$24); Alberta, \$26 (\$25); and British Columbia, \$38 (\$36).

## Egg-Laying Contest

Canada Makes Good Showing In Competition With The World. Canada is well to the fore among the nations of the world which take part in the egg-laying contest for hens during 1925. The average production by Canadian hens entered in the competition was 171.8, which compares with the high of 210.3 made by New Zealand birds and the low of 113.3 registered in Belgium. Other results were as follows: United States, 164.4; British Isles, 171.1; Netherlands, 172.8; Denmark, 145.7; Tasmania, 157.2; Australia, 205; and South Africa, 155.6.

## Tobacco Growing In Exports

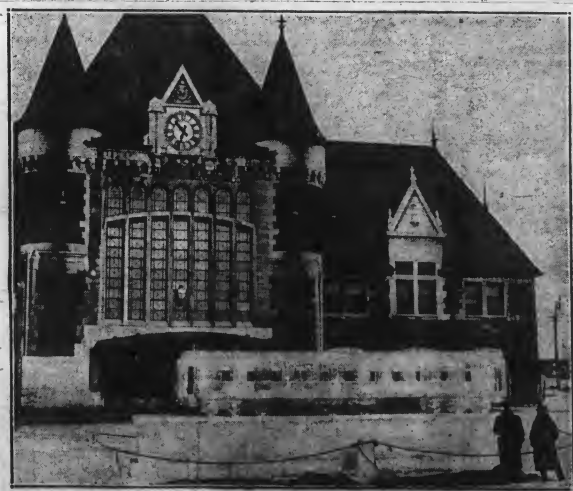

Industry Is Now To Receive Further Government Assistance. Tobacco growing in Ontario is to receive further government assistance. A commission of three professors in agriculture, on instructions from the minister of agriculture, will make a survey to ascertain the soils best adapted to the culture of tobacco. They will also inquire as to the best varieties, both for the Ontario soil and for the markets. Soil tests will be made on various farms and also at the government experimental stations within the tobacco districts.

## Ledge Of White Marble

Important Discovery Is Made On Vancouver Island. What may develop into an important industry is the discovery of a ledge of white marble off Pitzner's cross-road on the Malahat Highway, Vancouver Island. Tests were made recently by experts, who are convinced that the Malahat marble is of the highest grade. A ledge of over 150 feet of the white stone is in high indications are that the quarry may contain exceptionally high-grade white marble in large quantities.

## New Gas Flow

It is reported at Calgary that a new gas flow at 3,200 feet depth, estimated at 200,000 a day, in the McLeod No. 2 well in the Turner Valley, forced oil up between the casing. Government petroleum engineer David described the strike as "a good showing."

Fine Ice Statuary at Quebec

Not the least of the many attractions that drew flocks of visitors to Quebec City for the Frontenac Winter Sports season just terminated, were the many fine examples of statues cut in ice that stood in front of stores, railway stations and prominent buildings all over the Ancient Capital. Of these one that drew the majority of eyes was the representation of a Canadian Pacific Railway coach that stood outside the Palace Station. This might almost have been an actual copy of the coach, which was had been poured and then allowed to freeze, so close was the resemblance and so exact the copy. This piece of art work in ice stood opposite the station for close on two months

# New Variety Of Wheat May Have Effect Of Revolutionizing Grain Growing In The West

The new wheat named "Garner" developed at the Dominion experimental farm at Ottawa, will be available for distribution this spring, and it is conservatively stated may have a revolutionary effect again wheat growing in Western Canada. No more could be said of the potentially claim for this new variety than that it will probably have stimulation as great as when Marquis wheat was first developed and made available to farmers.

A decade and a half ago Marquis wheat, which was produced after long years of experimenting upon demands for an earlier maturing wheat, proceeded to revolutionize grain growing in the prairie provinces, and has been an outstanding factor in developing that area into one of the great granaries of the world. Marquis wheat reduced the period between seeding and harvesting from 120 to 110 days, which meant that wheat of the finest quality could be garnered well in advance of the time necessary for the ripening of former varieties, and that the risk of injury from rust, hail and spring-frost was largely eliminated. It meant that hard spring wheat could be cultivated successfully in areas much farther north, and it brought millions of acres in Western Canada within the wheat belt. It was estimated last year that 30 per cent. of the spring wheat production of Canada, and 60 per cent. of that harvested in the United States, was of the Marquis variety. Marquis wheat has added hundreds of millions of dollars to the wealth of Western Canada, and the world benefit resulting from the discovery has been estimated at half a billion dollars.

Now the new wheat, Garner, steps upon the stage, and its discovery promises to be an achievement of yet greater moment. Despite the tremendous boom of Marquis, it has been realized that perfection was not yet attained in the development of a wheat suited to the western climate. The annual loss sustained in the last days of the crop season by rust, a destructive disease which attacks the wheat in its ultimate ripening, is stated to be repeatedly a fourth of the western harvest. Working from Marquis wheat, experiments have been made, looking towards the production of a wheat which would have the same gluten content and high milling quality as Marquis, and yet would mature at a still earlier period. Garner wheat would appear to be the desideratum. It reduces the period between sowing and harvesting by another ten days, or to one hundred days, and is said to be in every respect the equal of Marquis.

The development of Garner wheat has been the same patient, painstaking work as characterized Marquis. Experimenting continued from the point where Dr. Saunders, the discoverer of Marquis, left off, his researches being extensively utilized. Season by season the earlier ripening plants have been carried out and cultivated experiments annually assumed an increasing importance until it was decided to end next to the various experimental farms and subject it to various adverse conditions. In 1921 there were innumerable cases where Garner wheat escaped frost where Marquis was nipped, particularly in Northern Manitoba. In 1925 Garner wheat was grown on about one hundred selected farms in Western Canada and its record is one which augurs well for the future of the prairies. In Southern Alberta, Garner wheat ripened and was threshed long before the first frost, and so escaped fall came, and was quite ahead of Marquis. The experience was the same in Manitoba, where, at Morden and Dauphin, Garner wheat was ready for the binder when Marquis had still ten days or more to go, and bore rust which had the possibility of great injury.

Many additional advantages the new wheat possesses which will make it very desirable to farmers and growers are pointed out. It matures earlier than either wild oats or sow thistle, so that it could be cut before those and gone to seed. All farmers growing wheat on a large scale, by devoting half their wheat land to Garner, will probably be able to save themselves the cost of at least one binder, being possible to cut and stock the Garner before the Marquis wheat is ready. From a national point of view the harvest should be ten days earlier, benefitting the grain mover to a certain extent, and making the lake route available this much longer.

Western Canadian agricultural experts express elation over the new wheat which has been given to the country. Garner is stated to be among the highest milling and baking wheats, a fact satisfactorily established by tests extending over a period of years. To make absolutely certain on this point, however, final marketing tests are being carried out at Winnipeg. Providing these are satisfactory, the Federal Government will proceed to distribute the Garner seed. There is no estimate, however, as to how much seed will be distributed in very small lots, probably ten bushels to a farmer. This may possibly be the first stage of a new wheat revolution and the opening of a new era in wheat growing in Western Canada.

## Canada's Leading Manufacturing Industry

Pulp and Paper Industry Has Made Rapid Strides. One of the outstanding features of Canadian industrial development in the past twenty years has been the rapid growth of the pulp and paper industry from a position of relative insignificance to that of the leading manufacturing industry in Canada. It attained this position in 1922, when it displaced the flour milling industry which had held first place in 1921 and 1922. There were 115 plants manufacturing pulp and paper in 1924, with a capital investment of \$455,496 and a combined output valued at \$187,174,703. Since these figures were compiled, the industry has made considerable headway and statistics covering operations for the year 1925, will undoubtedly show an even better rate of position, insofar as the other major industries of the Dominion are concerned.

## Saskatchewan Horses

Remarkable Showing Made By This Province At Big Fairs Last Year.

Saskatchewan horses made a remarkably good showing at the Toronto Royal and International exhibitions last year, judging from the total record of winnings. With 23 entries, 35 prizes were won at the Toronto Royal, 19 for Clydesdales, 4 for Belgians and 2 for Percherons. At the International, 1 special trophy and 4 reserve championships were included in the prizes won. At the International show at Chicago, 24 Saskatchewan horses carried off 44 prizes, which included 2 championships, 5 reserve championships and 1 special medal.

If your doctor gives you up it is time to give up your doctor.

# Let this great Tonic build you up!

If your body is skinny and run-down, if you can't eat or sleep, have fits of nervousness, simply complex-ion, you need Tonic to put some solid flesh on your starved bones and bring you back to health.

Tonic is Nature's great tonic and builder. It is made after the famous Tonic formula, of roots, herbs and curative herbs gathered from the four corners of the globe.

Get a bottle of Tonic at your drug-gist's today. Start the good work at once. You'll feel better right from the first. In a week's time you'll feel like a new person.

For Tonic gets right down to the seat of trouble. It purifies the blood, aids digestion, helps the appetite, puts on pounds of flesh.

Millions of men and women who were once sickly and discouraged have been lifted right back to health and strength by the Tonic treatment. Our pills contain one hundred thousand glowing testimonials from grateful users.

Tonic will help you just as it has helped millions of others. Buy a bottle at your drug store today and start the winning fight for prime, vigorous health. Don't put off good health any longer, and for constipation take Tonic Vegetable Pills.

CHAPTER I.  
"Be good, little girl! Dab your noses and put on your smiles. Good Morning is coming!"

It was a wonderfully sweet voice, and solem. But there was the flavor of a laugh hidden in the mock solemnity. That was a trick of Joanna's. She had adopted it from someone. Joanna adopted all tricks of manner that promised to be successful aids to her own original store of them.

Obediently, the young women who flanked Joanna behind the silk count-

denly of a long tailed coat, and tremendously impressed by his responsibilities as arbiter of the world's events and incident, the automobile buyer who rules the destinies of the silk department. Promptly at ten o'clock each morning, the store opened at nine. Mr. Harkness, freshly magnificent, tapped his fingers on the springs of the silk counter, accompanied each of the young women behind it with a friendly condescending glance, and said to them collectively:

"Good Morning!"

There was much rivalry among the

the silk counter unnoticed. Eyes stared. Blank faces turned upon the startled girl. And she altered into the fatuous face of the man across the counter as if he had woken her in some evil spell.

Mr. Harkness was no longer, "Mr. Good Morning." He was an ogre; the sort of a tyrant and keeper of tyrant's ammunitions. He stood there, cold, immovable, piercing. Waiting; waiting for Joanna, Joanna of the gold brown hair that had watched him on other mornings, to hurry away at this unheard of bidding.

For, so far as the record was remembered at the silk counter, no other girl employee had been summoned into the awful presence of the "Old Man." It suggested but one thing. That thing shap itself in Joanna's mind almost instantly. She had offended a customer; unconscious-ly, perhaps, but offended one; and an important customer; one who had the ear of the mysterious, unapproachable, thoroughly unknown "Old Man." And that meant, dismissal!

The buyer's fingers began to drum warningly on the counter. A summons to the office brooked no delay. He didn't know what nor how the "Old Man" so knew the name of the most important Joanna who, despite that gold brown hair and the captivating poses, was after all, only "Number 27 in the silks." Graydon, owner of the city's largest department store, was not the sort who knew the names of his hundreds of young women clerks by name. A few of the managers were that sort; not Graydon. "I believe I said, 'at once,' Miss Twenty-seven," he heard, and repeated, "I should advise that you interpret that as meaning 'now!'"

And then he added the afterthought that brought quiver to the girl's eyelids: the girl's eyes glared at him and repudiated viciously. "I'm sorry, Miss," that the other young ladies will conduct the counter satisfactorily until you return from your interview!"

Joanna could have choked him for that. Even in her trouble she remembered the different tone of him and the different light in the eyes of him on the morning of the day before when she flushed under his fawning. He knew, she felt, that she was going up to the taunting dignity of being dismissed by the owner. His code demanded that he have no consideration for even such a one as she, if she were to go into the owner's office. But Joanna was Joanna.

"So sweet of Mr. Graydon to send you along for me!" she murmured. "We were discussing you just last evening, you know—Mr. Graydon and I. I was telling him what a nice little boy you are—and shall you run along now, or shall you show me the way?"

If she was going to be discharged she'd have behind her something to be remembered by! She'd wanted a long time to shoot something like that at the supercilious "Mr. Good Morning." She glowered in the smothered gasp which choked in the throat of the girl next her.

"I'm 27. Did the Old—Did Mr. Graydon want to ask my advice about the business today?"

The secretary ignored the affection. "Oh, so you are Joanna?" she said, simply. "I sent Mr. Graydon's summons to your department chief. Don't know what it is, but I'm sure it's important. I'll tell him you're waiting."

Joanna, urged by the secretary, "Striking Medical Testimony"

The definite decision by eminent medical authorities that cancer is caused by dietetic errors common to civilization is of vital importance to sufferers. The necessity for including in the dietary regular quantities of uncooked fruit and vegetables is insisted upon, as the process of cooking robs them of their valuable salts. The new method of treatment is therefore, of giving patients regular quantities of the assimilable "salts" of potassium, and placing them on a dietary which is rich in potassium in its natural condition. The results are proving so highly successful that medical men are recommending or adopting it on behalf of their patients. The following is only one of a large number of similarly encouraging letters we receive from doctors proving the great value of the Cantastum Treatment to patients suffering from cancer:

Oct. 2, 1924, Colchester. "Having tried your 'Cantastum' on a patient, commencing July last, I was surprised to learn from her today that her two sarcomatous breasts, with their associated lymphatics, had almost entirely disappeared. Please send me another 'Cantastum' treatment, for which I am most grateful."

Yours faithfully, Dr. H. W. A. FREE BOOK, fully explaining above treatment, has been written for sufferers or any one interested in the most successful method of fighting "The Cancer Scourge." Applications for this book should be addressed to Charles Walter, 25 Brunswick Avenue, Toronto 4, Canada. Sole Canadian and U.S.A. representative, The Cantastum Co., England.

Joanna's mind almost instantly. She had offended a customer; unconscious-ly, perhaps, but offended one; and an important customer; one who had the ear of the mysterious, unapproachable, thoroughly unknown "Old Man." And that meant, dismissal!

The buyer's fingers began to drum warningly on the counter. A summons to the office brooked no delay. He didn't know what nor how the "Old Man" so knew the name of the most important Joanna who, despite that gold brown hair and the captivating poses, was after all, only "Number 27 in the silks." Graydon, owner of the city's largest department store, was not the sort who knew the names of his hundreds of young women clerks by name. A few of the managers were that sort; not Graydon. "I believe I said, 'at once,' Miss Twenty-seven," he heard, and repeated, "I should advise that you interpret that as meaning 'now!'"

And then he added the afterthought that brought quiver to the girl's eyelids: the girl's eyes glared at him and repudiated viciously. "I'm sorry, Miss," that the other young ladies will conduct the counter satisfactorily until you return from your interview!"

found a chair. Somehow the atmosphere of the Old Man's office worried her. It wasn't what she'd expected. Not at all in keeping with the most approved disclosures of old men's dens on the movie screens. It was startling bare, and solid, and sedate. And the secretary wasn't as an owner's office assistant should be. Not even pretty. That is, not pretty according to the silk counter standards. She was pale, and needed touching up at the cheek bones. Joanna could have shown her how to lay on one of red, wash of blue, rub it in, and wait with Florence's plink. And she wore no bracelets or bangles or even, the dangling jet ear rings which were the mode.

Really, she must be stupid, that secretary of the Old Man's, and with her opportunities! Still — something about her fascinated Joanna. Miss Twenty-seven might rub her lips and wonder if she had marked them too darkly.

(To be continued)

The Garden Railway

C.P.R. Has Stupendous Task in Supplying Seeds and Plants to Beautify Station Grounds

Living up to its title of the "Garden Railway" the Canadian Pacific Railway through its horticultural department, and floral committee now has in hand the stupendous task of supplying seeds, trees and shrubs, perennials and bedding plants, to thousands of stations, little and big, right across the system from St. John to Victoria. The hauls have already been supplied by the committee in large quantities, but these were all planted in the fall and only await the melting of the snow to throw out their leaves. In connection with the seeds, these are already being propagated under glass by experienced gardeners with a view to being transplanted — when raised — in addition the committee sends out many thousands of standard seed packets to station agents and also for use in section foremen's gardens, bunkhouses and around shops with a view to giving them that touch of beauty and fragrance for which the C.P.R. has been justly admired the world over.

Around the first of May many thousands of trees, shrubs and perennials are shipped out over the whole system. These include willows, poplars, lilac, spruce, honeysuckle, syringa, Weigela, Caragana, hydrangeas, and roses of the climbing and climbing varieties. The perennials take in the form of all shades and colors: Tiger lilies, Iceland poppies, equisetum, dianthus, sweet william, pyrethrum, delphinium, etc. The latter make permanent displays from year to year and need a minimum of attention.

Enormous quantities of annual bedding stock are also provided and among these are: Geraniums, cannas, coleus, asters, pansies, salvia, petunias, marigolds, anthurium, phlox, Knochias, zinnias, verbena and alyssum, to mention only a few.

As will be recognized from the above the horticultural department and floral committee of the C.P.R. has its hands full to cope with the immense amount of work that falls to it in connection with this distribution. This, however, is now well in hand and the major part of the work is done or well on the way to completion. The co-operation of the men all along the line makes the work the outstanding success it undoubtedly is.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother's Own Eucalyptus to drive out the parasites.

Switzerland depends on other countries for its egg supply.

A hyphen is the only plausible excuse for breaking your word.

Minard's Liniment for dandruff

Some Of Nature's Puzzles

Many Things That Evidently Have No Explanation

Nature is full of puzzles. We have discovered radium and the use of X-rays, yet it is not known how or why a whip makes a noise when cracked. What cracks—the whip or the air? If a man wants light he must first make heat, yet a glow-worm or a firefly, deep blue and many plants and fungi, produce a cold light. Carnivorous animals are frequently striped and spotted, but the mild grain or grass eater is seldom so marked. Why is this? Again, there are no blue roses, nor has there been a blue rose! And why is a purple blossom so common to poisonous plants? If you put a little salt in water it dissolves. Boil the water away and the salt reappears. What then has become of the salt while it is dissolved in the water? The water, it would seem, decomposes the salts into particles highly charged with electricity. For this reason we have the authority of Professor I. A. Rowson, who adds that other substances dissolved in water do not act like salt.

2 Years' Backache Subdued by "Nervine"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloan, from Georgetown. "While in Smith Bros. Drug Store, I heard of Nervine being a wonderful pain-destroyer, so I decided to try Nervine. Thanks to Nervine, my two years' backache was rubbed away, and today I am perfectly well."

All those who suffer from weak, aching muscles, those whose muscles are stiff, whose joints are swollen, let them try Nervine—the liniment that never fails. See at all dealers.

Good Advertising

Men are laying down the ethics of advertising, and have come to find four principles—that the article must be the best of its kind, that it must fill a real need adequately, that it must be presented in its best form, and that it must be worth the price charged.

MARCH WEATHER DANGEROUS TO BABY

On Account of the Very Sudden Changes in Temperature

On March 1st, the weather was bright and bright, but the next day blue light and cold—so extremely hard on children. Conditions make it necessary for the mother to keep the little ones indoors. They are often confined to their rooms, and catch colds which rack their whole system. To guard against these colds and to keep the baby well, fill the better, brighter days come along, a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach sweet and his bowels working regular.

Baby's Own Tablets are a mild but thorough laxative which never fails to regulate the stomach and bowels and thus relieve colic and simple colic. Baby's Own Tablets are available at all drug stores or by mail at 25 cents a box from The Williams' Medicine Co., Brockville, Ont.

Alberta's Coal Production

The total coal production from the mines of Alberta during the past year amounted to 5,853,394 tons, or 679,681 tons more than the total for the previous year. Last year's production was as follows: Domestic coal, 3,156,359 tons; sub-bituminous, 581,835; and bituminous, 2,115,200.

Hard and soft coals both yield to Holloway's Corn Remover, which is entirely safe to use, and certain satisfactory results in its action.

A violinist works a bow—and some girls do likewise, yet they spell it differently.

A woman may envy the beauty of another, but she never forgives it.

Switzerland depends on other countries for its egg supply.

Head and Chest Colds Relieved In a New Way

A Salve which Releases Medicated Vapors when Applied Over Throat and Chest.

Inhaled as a vapor and, at the same time absorbed through the skin like a liniment, Vicks VapoRub relieves immediately inflamed, congested air passages. This is the modern direct treatment for all cold troubles that is proving so popular in Canada and the States where over 17 million jars are now used yearly. Splendid for sore throat, tonsillitis, bronchitis, croup, head and chest colds, catarrh, asthma or hay fever. Just rub Vicks over throat and chest and inhale the medicated vapors. It quickly loosens up a cold.

VICKS VAPORUB

OVER 21 MILLION JARS USED YEARLY

Little Helps For This Week

Without need good from them to whom it is due.—Prov. 11, 27.

Be quick to praise, be slow to scorn. For what the future holds we know not.

Today the sun has but a thorn. Tomorrow brings the rose.

There are a few hardy souls that can struggle on atony soil, shrubs that can wait for the dew and sunbeams, vines that will climb without kindly training—but only a few. Utter the kind word when you can, give the helping phrase when you see it is deserved. The thought that "no one knows and no one cares" blights many a bud of promise.

Russian Nobility Among Workers

Many Traded Refugees Are Pursuing Trades in Germany

In Germany more perhaps than at any other country the strange and odd relics of the Russian revolution are visible. Many noble refugees from the Soviet regime are operating businesses and pursuing trades in Germany, and it is not unusual to see a taxi driver drop into a certain coffee house and suddenly appearing another shabby driver in the corner, so over and kiss her hand. She is a grand duchess and he an ex-officer of the Imperial guard. The coffee house itself is operated by a former gendarme and his children.

Poultry Pool Station

That a co-operative poultry station be opened in Brandon was decided at the annual meeting of the Manitoba Co-operative Poultry Marketing Association held in that city. The meeting was attended by about 75 delegates from various localities of the association throughout the province and interesting reports as to progress made by the poultry and egg pools were presented.

DOCTOR ADVISED OPERATION FOR MRS. PENN

She Escaped It by Taking Lydia E. Pinkham's Vegetable Compound

Windsor, Ont.—"After the birth of my first baby I was very much run-down in health and the doctor said I must have an operation as I was suffering from a displacement. A friend wanted me to try my medicine—Lydia E. Pinkham's Vegetable Compound—and I took it steadily for a year. During this time I was carrying my second baby and I felt real well all the time and did not have a hard confinement. I feel sure the Vegetable Compound did me a lot of good, and all my people do, too. One sister in Leamington, Ontario, takes it, and both sisters praise it as a good medicine. I am more than pleased with the result."—Mrs. W. PENN, Windsor, Ontario.

Mrs. Corbin Relieved from Pain. "I had pains across my back and in my side for two years after my first baby was born. My mother had taken Lydia E. Pinkham's Vegetable Compound and I read about it in the papers, so I tried it and the pains all left me. I have a family of three children now, and the medicine helped me during the months before they were born. I recommend it to my friends."—MRS. CARY W. CORBIN, Main Street, Steviacke, Nova Scotia.

W. N. U. 1821

## LOCAL, PERSONAL AND GENERAL NEWS

Rumor has it that the present light and water rates are not bringing in sufficient revenue to pay operating expenses and profit guaranteed by the franchise. If this is correct, some effort ought to be made by the council to popularize the using of more electricity for light and power purposes. A good start to make in this direction would be more street lights, many more.

The Fernie council has decided to loan the swimming pool committee \$1,000 to help them over their financial difficulties.

An unofficial report this week in local circles intimates that the civic auditor has made his annual visit to Coleman and completed his work. A ratemakers meeting may be held in the near future and the report presented.

### Alberta's Mineral Production

Total value of Alberta's mineral production in 1925 was \$25,000,718, compared with \$22,344,990 in 1924, according to the preliminary report of the Dominion Bureau of Statistics issued February 22. The principal items of production during the year were as follows:

Quantity	Value
Coal, 5,867,213 tons	\$19,810,988
Oil, 169,432 bbls.	758,837
Gas, 8,998,931 M Cu Ft.	\$2,700,000
Salt, 833 tons	
Cement, 396,857 bbls.	913,529
Clay, 629,698	
Lime, 39,852	
Stone, 30,838	
Tar Sands, 1,148 tons	4,692

The most outstanding feature of the production for the past year was the vast increase in the output of crude petroleum. In 1924 Alberta occupied but an insignificant place in the production of oil in Canada, but in 1925 it suddenly took first place among all the provinces of the Dominion, producing more oil than all the others put together. The comparison of production shows that in 1924 only 844 barrels were produced with a value of \$41,355, but in 1925, 169,432 barrels were produced with a value of \$758,837. The rest of Canada produced 148,821 barrels with a value of \$429,318.

The Elk's Dramatic Club are going to Pincher Creek next week to stage their popular three act farce, "Mr. Temple's Telegram." The Pincher Elks have asked the local Dramatic Club to come and a full house is promised.

According to the auditors report in connection with the defalcations of the former secretary-treasurer of Blairmore, the treasury is short over \$5,000. It is reported that Mr. Wright has been arrested and will be brought back from England to stand trial.

Mrs. R. G. Powell, who was called to Agassiz, B.C., about a month ago owing to the serious illness of her mother, Mrs. Armstrong, returned home on Friday last.

Mrs. J. Glendenning, local representative from the Pythian Sisters to grand lodge in Calgary last week, is home again.

Contractor D'Appollonia is making rapid headway in repairing the damage done by fire to Mr. White's residence.

Mr. J. A. McLeod, superintendent of the International Coal & Coke Co., returned Tuesday morning from a trip to Montreal and Toronto. While in the East Mr. McLeod witnessed Varsity and Peterboro hockey teams in one of the Allan Cup playdowns, and he is of the opinion that last year's Coleman Tigers would have had little difficulty in beating either team.

Messrs. Broley & Kordus, of Fernie, who have the contract to build the new road from West Coleman to Crow's Nest, are now busy making their camp at the Lake Hotel in preparation of an early start on their contract which is to be completed in July.

Mr. Joe McKenna, who for several years has held down the position of night operator at the local station and made many friends in Coleman, left Sunday to take a similar position with the C. P. R. at Redcliff.

The L. O. B. A. will hold a Bazaar in the Knights of Pythias Hall on Saturday, April 3rd, from 2 to 6 p. m. Fancy Work Table, Candy and Home-Cooking Tables. Afternoon Tea. —81-2 n p.

On Friday and Saturday of this week at the Ouimet Store, there will be a splendid showing for Easter of Ladies' Dresses, Coats and Hats. This is a good opportunity to have a large assortment of these articles to choose from, all of which are specially priced for rapid selling.

Mr. Andrew Goodwin, one of the most highly respected and best known residents of Bellevue, died Saturday last following an operation for appendicitis on Friday.

### Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unequalled quality, phone No. 13, THE COLEMAN TRADING CO., LTD., agents for Franche Bros., Lethbridge, advt.

### New Judges

The appointment was announced during last week of Hon. C. R. Mitchell, leader of the Liberal Opposition in the Legislature, to the position of Justice of the Appellate Division of the Supreme Court, in the vacancy created by the death of Hon. Mr. Justice Stuart of Calgary. W. A. MacDonald of Calgary has been named to the vacancy in the District Court Bench at that place.

### Proof Positive

Sapolio, at one time a household word, has all but been forgotten. The word "Sapolio" has been replaced by such others as "Bon Ami," "Old Dutch," "Sally Ann," etc., etc., although these new trade names designate products which have been manufactured for the same uses for which Sapolio was once the most popular. But, unfortunately for Sapolio, its manufacturers ceased to advertise, or cease to be a common word. Now, as if to prove beyond a doubt, that advertising pays, the manufacturers of Sapolio are once again launching forth upon a consistent and aggressive advertising policy, and "Sapolio" is again going to be a popular product.

## Minutes of Meeting Board of Trade.

A meeting of the Coleman Board of Trade took place on Monday with 32 members present and President Morrison in the chair. Minutes of last meeting were adopted as read.

### Tree Campaign Under Way

The committee on Municipal and Civic Affairs reported having got the tree planting campaign under way, and asked the assistance of all citizens in making this a success.

### Want Fire Dept. Reorganized

They also recommended the reorganizing of the town volunteer fire department, and the following committee was appointed to interview the town council in this matter: Messrs. G. R. Powell, H. Antel and F. G. Graham.

### Park Committee at Work

The Chairman of the Park and Lake Committee reported that the question of popularizing the lake had been taken up with Supt. Jamieson of the C.P.R., who had arranged to meet this committee at a date to be set in the coming week, and that if nothing came of this meeting they had other plans in view.

### New Committee Appointed

Moved by Mr. Rippon seconded by Mr. Graham that we appoint an entertainment committee and that Mr. R. F. Barnes be chairman of this committee. Carried.

### Board to Hold Luncheons

Moved by Mr. Rippon seconded by Mr. H. Hart that the Board hold periodical luncheons, the time and date to be set by the President, and members to be notified by postal card of said date. Carried.

### Publicity Suggestions

Several publicity suggestions were put forward by members of the Board for the consideration of the Publicity Committee.

### Want Town Remove Garbage

It was moved by Mr. R. F. Barnes, seconded by Mr. J. M. Allan, that the Municipal and Civic Affairs Committee interview the town council regarding the question of garbage disposal. Carried.

### History Still Repeating

"Willie," asked the teacher, "what was it Sir Walter Raleigh said when he placed his cloak on the muddy road for the (beautiful) queen to walk over?"

Willie, the ultra modern, gazed about the classroom in dismay, and then, taking a long chance, replied: "Step on it, kid!"
